

HH1265548 [CREE LED Flood/Spot Combo Grille Mounted Light, 4000 Lumens]

Instruction Guide

1. Remove the original light from the machine by removing screws in the corners of the rubber grommet. Remove grommet and light from machine
2. Remove electrical connectors from the light
3. Install one end of the new electrical connector to the wires on the machine and the other to light wiring. **Wires may need to be trimmed to prevent interference with fan**
4. Install new frame bracket onto machine using screws
